

GREENEX NEMATANTHUS 'GOLDFISH PLANT'

For more information, please visit [GREENEX.COM](https://www.greenex.com) or [CONTACT YOUR LOCAL SALES REPRESENTATIVE](#).

NEMATANTHUS 'GOLDFISH PLANT'

Nematanthus gregarius - This plant is known for its unique flower that under the correct conditions, it will produce a flower that is wholly fused, forming a small opening at its tip resembling a Goldfish in shape and colour. This explains the common name given to it - the 'Goldfish Plant'.

With the ability to produce a stunning flower and its unique foliage, it can be produced in multiple ways.

At Greenex we work to bring reliable supply of unrooted cuttings to growers around the world. We ensure you can get a good consistent quality.

Available for shipment to your location as unrooted cuttings.
