CAMPANULA

The Ocean® Series

Campanula is a perennial which originates from south European mountains. It has, through intense development work, been cultivated into a pot plant.

Campanula is sold both as an outdoor and indoor pot plant. It is ideal to be planted in the garden after having flowered (has no problem surviving the winter).

Campanula Pacific Ocean®, Midnight Blue Ocean® and Ocean® Blue & White double flowered represent a huge step forward for Thoruplund Breeding.

The New Varieties are very compact with a very good budding, a long shelf life and are winter hardy.

‘DEEP BLUE OCEAN®’

Flower: Deep blue.
Growth: Compact with good branching.
Recommended pot size: 9-15 cm (3,5-6").
